LABORATORY

Safe Experiment Space for Student

The laboratory furniture was made to deal with several types of scientific activity and it's easy to mix or reconstruct the space.

Cetral control is possible for facilities, as various equipment is stored easily.

Phenolic laminate work-top is applied to the experiment board and sink, so as to prevent color change by chemical material and damage by scratches, and to repress the growth of virus.

EDUCATION

The library furniture that creates new knowledge, keeps and shares knowledge, constructs an excellent library environment where the search for data and use can happen freely.

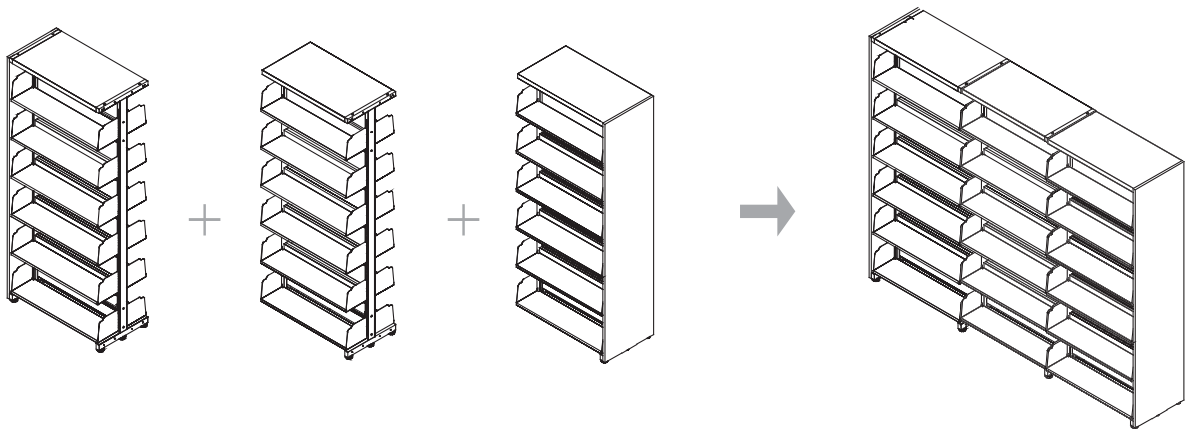

LIBRARY

Various shelving side panel option is available. Shelving is stylishly designed with natural wood-finish side panel and metal-finish side shelves.

Endless Connectable Shelving System

The library furniture series, constituted by many types of bookshelves, reading boards and carrels possible any type of library, can be organized by room, by theme, in many environment and use.

LECTURE TABLE

This is a modern design practical, future oriented multi functional table that's strong and practical, suitable for auditorium, large scale training center and academy. It's possible to arrange individual unit of the table and after the use it's possible to fold it to keep.

Modern Design and Efficient Mechanism

The folding table series is a functional table system that makes the use of the space more efficient and its elegant frame structure and board increases the completion of the design.
