JWESYS

MegaView is designed to create a highly functional office by seamlessly organising the space within which work is done. The result is a stress free environment in which productivity is maximised.

Multi-functional work stations in this office system remove all clutter. Multi media, document storage and active files have their own place and space, leaving work surfaces clear of obstructions.

Both in private space and in open plan, design is efficient and purposeful. Expandable tables attached to the main desk create larger working areas which can also be used as meeting zones.

Complex communication patterns characterize the modern office. The MegaView series provides layouts which guarantee privacy and yet, simultaneously create the openness and space in which ideas can flow.

By utilizing partitions of varied heights, privacy and functionality is assured.

MegaView guarantees independent and private space with its individual work zones. Modular units facilitate customization.

While this system maintains the ideal, uncluttered working environment for users, it also enhances communication capabilities by facilitating network cabling.

Ergonomic design ensures easy communication and convenient work surfaces when team work is necessary. Privacy is maintained by the separation of each working space by panels.

MegaView has the potential for design variation through the manipulation of modular units and expandable working space. Changes can be made according to the evolving needs of the office.

Attain high levels of work efficiency and creativity by constructing secluded work space with panels for space divisions.

The MegaView office also provides sufficient space and convenient features for those who work with multimedia.

Our multi-functional workstation removes all clutter. Multi media, document storage and active files have their own place and space, leaving work surfaces clear of obstruction. Both in private space and in open plan, design is efficient and purposeful. Expandable tables attached to the main desk create larger working areas which can also be used as meeting zones.

You can turn utility into creativity.

Complex communication patterns characterize the modern office. The MegaView series provides layouts which guarantee privacy and yet, simultaneously, creates the openness and a space in which ideas can flow. By utilizing partitions of varied heights, privacy and seamless communication is assured.

MegaView guarantees independent and private space with its individual work zones.

Modular units facilitate customization in space organization.

The system maintains the ideal, uncluttered working environment for users.

It also enhances communication capacity by facilitating network cabling with its complete wiring systems.

Ergonomic design facilitates smooth cooperation when team work is necessary. Privacy is maintained by the separation of each working space by panels. Work efficiency is maximized in the "L"-shaped worktop.

Turn utility into functionality(Off-Module)

Curve Bar Design
Side and top bars are finished with the curve motif. Beautiful design creates a unified effect.

Tile Finish Bar
The completed panel installation can be upgraded by inserting a soft finish bar into the gap.

Metrical System
As the frames and tiles are standardized, the partitions of all sizes can be combined and arranged only by extending tiles.

Partitions of varied heights facilitate communication. Independence is maintained by the separation of the working space with glass panels. Work surfaces are large enough to accommodate multimedia equipment while leaving sufficient room for work activities.

MegaView's full glass panels can be arranged to provide private meeting rooms and offices while, at the same time, allow visibility to the open office. Panel-hung storage cabinets are securely installed for an abundance of overhead storage. Mobile pedestals in two-drawer and four-drawer arrangements slide easily under work surfaces for additional secure storage.

Wire Management Systems

With the movement of staff and changes in business processes, MegaView can be relied to facilitate a smooth transition.

Data electrics and voice ports are conveniently installed to provide easy access to multimedia appliances.

Power lines are easily connected to multi-tabs.

Adequate space within frames facilitates heavy and complex wiring.

Fibre optical cables, telephone, data and electrical wires are easily accommodated at raceway or desk height level.

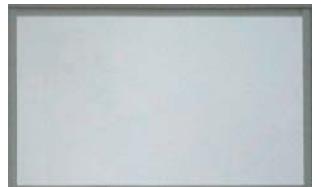

Power outlets are conveniently located.

Tile Collection

The MegaView panel system is steel-based, but fabric, glass, white board, melamine and functional tiles are also available. Attachable/detachable tiles are easily adapted to the structure.

Tackable/Acoustical

▼ Tile Finish Bar

The completed panel installation can be upgraded by inserting a soft finish bar into the gap.

▼ Tile Edge

All tile edges are completed as curves, not right angles. The three dimensional effect of each placement creates a distinguished look.

Storage Solutions

With office automation, storing information and data has become an important issue. The MegaView storage system provides the office with a variety of storage options. Lateral filing cabinets are available in four-drawer, three-drawer and two-drawer combinations.

Three drawer and two-drawer mobile pedestals roll easily under desk surfaces and provide staff members with easy access to small and regularly used items.

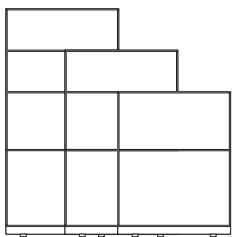

All storage items are made from heavy gauge steel. Steel ball bearings which allow for the smooth opening and closing of drawers.
